

Ludek Vodicka

Senior Full-Stack Engineer

TypeScript · Node.js · Web3 · Solidity · Next.js · deep C++ roots

ludek.vodicka@gmail.com · linkedin.com/in/ludekvodicka · github.com/ludekvodicka · ludekvodicka.github.io · Brno, Czech Republic

PROFILE

Senior full-stack engineer with 25 years of shipped production code, covering architecture, implementation, testing, CI/CD and production operations. Current stack: TypeScript, Node.js, Next.js and Solidity/Web3 on deep C++/Qt foundations. Founder and owner of Inventic s.r.o. and author of Skipper, a visual ORM tool with \$1M+ lifetime revenue; as CTO at Moonhill Capital built the Web3 platforms behind \$10M+ raised across 40+ token sales. Day-to-day delivery is accelerated by multi-agent AI tooling I built and maintain myself; the architecture and the responsibility for what ships stay with me.

SKILLS

Core stack	TypeScript · Node.js · Next.js · React 19 · Solidity · Wagmi / Viem · MongoDB · PostgreSQL · Express · MUI
AI-assisted delivery	Claude Agent SDK · MCP servers · Multi-agent orchestration · Human-in-the-loop · Adversarial verification · Local ASR · Whisper · Python
Cloud & DevOps	Docker · Azure · AWS · SES/SQS/S3 · Jenkins CI · ESXi · Git · Code signing
C++ & systems	C++ 11–20 · Qt · Boost · Multithreading · High-performance · DLL injection / API hooking · MySQL

EMPLOYMENT HISTORY

2025 → now	Building modern web, Web3 & AI applications Freelance · Inventic Shipping products with my own agent tooling: the DEUSS/IDA market-surveillance platform, classification & reporting pipelines, Telegram community intelligence, and an ecosystem of custom Claude Code agents and MCP servers.
2024 → now	Crypto operations & automation Moonhill Capital Automating the fund's crypto operations: multisig treasury runs, exchange settlement, scheduled distribution with reconciliation reporting, plus node operations and protocol tasks across EVM, Solana and Cosmos.
2022 → now	CTO · AngelsSquad Platform Moonhill Capital Own technology end to end: secure infrastructure, Solidity fund-collection & distribution contracts on EVM and non-EVM chains, the Web3 platform and Next.js apps, plus technical due diligence. 40+ raises.
2021 → now	Web3 Engineer Freelance DEX LP sniping, contract-scanning bots, presale/NFT sniping on tier-1 projects, Merkle-proof farming automation, autonomous airdrop bots and Cosmos staking automation across 100+ wallets.
2014 → now	C++ Engineer · Skipper Inventic s.r.o. Designed and built Skipper, a cross-platform visual ORM editor & code generator sold globally: Qt GUI, XSLT code generation, TDD and a full Jenkins CI pipeline with signing and notarisation.
2006 → now	Owner & Chief Developer Inventic s.r.o. Founded and run my own software company, from a C++/MFC warehouse system and high-performance trading engines, growing into developer tooling, infrastructure and a full Web2/Web3/AI stack.
2000 → 2006	Developer · Consultant Self-employed The start of a professional career that began as a kid writing code: early development, consulting and project management that set the foundation for everything since.

SELECTED PROJECTS

DEUSS / IDA

Market surveillance

IDA (Internal Diligence Agent): a real-time market-surveillance & compliance platform for DEUSS, a blockchain bond-trading marketplace.

TypeScript · Node.js · Foundry / Solidity · Real-time events · AI detectors · Plugin architecture

Skipper

\$1M+ revenue

A visual ORM designer & multi-framework code generator sold globally to developers.

C++17 · Qt · XSLT · Boost · Jenkins CI

Jamat

Multi-agent terminal

An open-source desktop control center for running many Claude Code and Codex sessions in one tiling workspace, and for reaching the sessions on my other machines over the network, including letting one agent operate another's tab.

TypeScript · Electron · React · xterm.js · node-pty · pnpm monorepo

AngelsSquad Launchpad

\$10M+ raised

A full Web3 fundraising & token-distribution platform I built as CTO (public dApp plus operator backoffice) and the Solidity core behind it: on-chain deal management, presales, vesting and gas-efficient Merkle-proof claim distribution, with role-based access, KYC and wallet connect across EVM and non-EVM chains.

Solidity · Hardhat · OpenZeppelin · Next.js · Wagmi / Viem · Merkle proofs · Solana · KYC

Moonhill Crypto Operations

Treasury automation

The automation behind the fund's day-to-day crypto operations.

TypeScript · Ethers · CosmJS · Solana web3.js · Multisig · MongoDB

SecretKeeper

Zero keys in code

A custody and signing service that keeps private keys and API secrets out of application code.

TypeScript · Node.js · Encrypted storage · Approval broker · Audit log · SSE · EVM · Cosmos · Solana signers · MongoDB

Moonhill Capital Platform

Investor portal

The web surface of a VC/token fund: investor portals with impersonation, admin ops with on-chain wallet integration, a node-graph 'labs' workspace, plus news/CMS, email and PDF, all in one design system.

Next.js 16 · React 19 · MUI 7 · Directus · Wagmi / Viem · React Flow

CryptoTracker

Millions of trades/sec

A high-performance market-data engine: a multithreaded message broker aggregates and processes millions of trades and prices per second, feeding a fast evaluation-tree engine for technical indicators.

C++ · Multithreading · WebSockets · Message broker

OPEN SOURCE

ludekvodicka/jamat	Multi-agent terminal: many Claude Code & Codex sessions in one tiling workspace, across machines. MIT, installers for all three platforms.
ludekvodicka/ScreenMCP	Human-controlled desktop vision for AI agents: you pick the monitor, window or region. Localhost-only, bearer auth, redaction masks, audit trail.
ludekvodicka/vscode-tortoise-git	TortoiseGit inside VS Code: commit, log, blame and diff, with the install auto-detected from the Windows registry.
ludekvodicka/vscode-tortoise-svn	The same bridge for TortoiseSVN, with multi-root workspace support.

EDUCATION

2004-2007

Master's degree, Applied Informatics

Masaryk University, Faculty of Informatics, Brno

2000-2004

Bachelor's degree, Applied Informatics

Masaryk University, Faculty of Informatics, Brno

LANGUAGES

English: daily working language

Czech: native

COOPERATION & AVAILABILITY

Available immediately · B2B contract · full-time

Remote-native · CET (Prague) · open to full-remote roles
